## About Us

**A Family Company:** We are a locally owned, family business worthy of your trust. We are not a nation-wide franchise and do not telemarket. We have been serving the greater Grand Rapids area since 1969.

**Personal Services:** In order to serve you best, we want to get to know you and your lawn. You are much more than a number to us; you are a partner in growing a gorgeous lawn; a lawn your neighbors wish they had!

**Convenience:** We can care for your lawn for nearly the same cost as you can do it yourself, but without the hassles for you. We also provide free service calls to correct any problems or diagnose any concerns. Let us put our many years of experience to work for you.

## Our Services

### Fertilization and Weed Control:

Our Lawn Care Program uses a blend of organic and synthetic fertilizer. This organic-based program gives your grass a dark green color but without extra mowing and clippings. We pride ourselves on providing our customers with excellent weed and crabgrass control.

**Merit Grub Control:** Grubs damage a lawn by devouring its root system. Merit is extremely effective and eliminates grubs by controlling the summertime eggs that hatch in your lawn.

Grubs also draw predators to your lawn such as skunks, raccoons, moles, and birds. Merit Grub Control works so well, it includes a **100% grub control guarantee!** We apply Merit once a year in the summer and it is part of our Lawn Care Program.

**Liquid Aeration:** Liquid Aeration breaks down thatch and loosens topsoil. This process increases water penetration, encourages root growth, and increases oxygen in the soil. Liquid Aeration breaks the bonds between molecules in the soil, creating space for roots to expand.

**Lawn Flea, Tick & Ant Control Program:** This service controls the flea, tick, and ant population in your turf. This program consists of 2 application per year, one in early summer and another in late summer. The product is friendly for kids and pets.

## Testimonials

*"You've managed to keep a full acre of grass consistently green, healthy and weed-free."* -Don Doezema, Grandville

*"With Spider, Wasp & Ant Control, we can enjoy our porch without being bothered by bees!"* -Gene & Sharron Panozzo, Caledonia

*"Weed & Feed always operates in a professional manner and listens to the customer."* -Ray Kloostra, Byron Center

*"My lawn truly looks great, compared to where it was earlier this year. I am a happy customer."* -Fred Honore' II, Zeeland

**Spider, Wasp & Ant Control Program:** This outdoor spraying program controls spiders, wasps, hornets, ants, earwigs and dozens of other creepy crawling insects that invade your home. With this program, we spray around the foundation of your home, behind shutters, under decks, behind basketball hoops, under eaves, inside play equipment and many other places where insects make their nests. Treatments are friendly for children & pets and occur five times per season.

**Tree & Shrub Feeding:** We use a unique, nutrient balanced, tree fertilizer that is packed with iron, copper, sulfur, manganese and zinc; all the elements necessary for proper tree and shrub care.

**Vegetation Control Program:** This monthly spraying program controls unwanted vegetation in your landscaping, driveway, sidewalks and parking lots from May to September. It controls both weeds and grasses. Hand weeding is not part of this program. Prices start at \$225 for the season.
